

Abstract

An electric power tool, in particular an electric hammer, having a drive unit (11) contained in a housing (10), an impact mechanism (12), and a handle (13),
5 including a cam (14) that is driven by the drive unit (11); the impact mechanism (12) has moving parts (15, 16).

At least two of the moving parts (15, 16) are able to move inside a
separate guide cylinder (17) that is stationary in relation to the moving parts (15,
10 16) and the cam (14).
